Height offset of just  
1.50 m instead of  
basement

The drivable grating vibrates to loosen any adhering material, therefore ensuring nearly unmixed metering.

Top part of feeder with a capacity of approx. 23 m<sup>3</sup>

Always the right conveying capacity: from 40 m<sup>3</sup>/h to over 400 m<sup>3</sup>/h

Unmixed metering, even with frequently changing material

Convenient gateway, stable brink wedge

Prefabricated components for fast assembly

Easy access to all parts for simple maintenance

The flared opening to the feeder on the top section makes it easy for truck drivers to enter over the partially drivable grating.

# Good to know ...

- \* Perfectly combinable: FlatFeeder and steep incline conveyor from VHV
- \* Quiet, low-wear belt conveyor system
- \* Configurator for designing your system
- \* Service beyond the product
- \* Suitable for excavator or crane loading
- \* Flexibly applicable, even for unloading ships
- \* VHV's FlatFeeder for recycling building materials – a market for the future

Are you looking for an efficient way to transfer bulk materials measuring up to 40 (60) mm in diameter? Then VHV has the answer.
